1.

25X1X6 a. [REDACTED] 25X1X6
[REDACTED] Oslo, Norway. The Norwegians have good scientific minds but no funds or facilities, little equipment. They have a radio-astronomy auditorium at this institute, with a graduate student helping Rossland set it up. Norwegians are doing remarkable things with the little they have. I would say that the only real USA competition is in Australia.
25X1X6

25X1X6 b. [REDACTED]
[REDACTED] in Stockholm who is working on terrestrial magnetism and studying the electro-dynamic properties of liquid forms of several sodium salts and how it might be applied to terrestrial and solar atmospheres.

25X1X6 c. [REDACTED] Sweden whose research in the study of ionization propagation is noteworthy.
25X1X6 [REDACTED] Zurich, Switzerland noted for his work on the vacuum tube. The professor seems to be all right but the Phillips Company with whom [REDACTED] was associated 25X1X6 during World War II was known to have co-operated with the invaders.
25X1X6 [REDACTED] too, therefore, is regarded with some distrust.
